

Mendygo

-AI That Adapts

Warehouse Management System

Your inventory changes every second. Why is your software stuck in yesterday? Traditional WMS is static. Mendygo is adaptive. Our AI watches your workflows, learns your seasonal peaks, and suggests smarter storage logic automatically.

What **Mendygo WMS** Does?

Mendygo Warehouse Management System provides real-time visibility into inventory, streamlines warehouse operations, and ensures accurate order fulfillment from receiving to dispatch.

Smart Inbound

Automate replenishment and track inbound goods the moment they hit the dock.

Zone Mapping

Digital mapping of warehouse zones for faster retrieval and better inventory placement.

Equipment Health

Monitor battery/fuel levels of your material handling fleets to prevent downtime.

Compliance Guard

Auto-alerts for safety violations and adherence to Standard Operating Procedure (SOPs)

Mendygo WMS centralizes inventory tracking, optimizes storage and picking, and improves order accuracy across the warehouse.

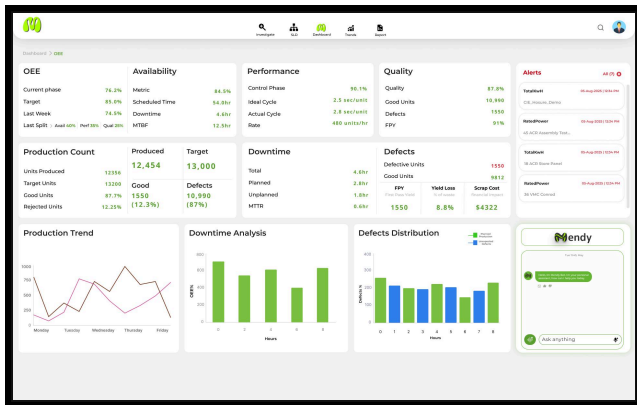

Benefits of **Mendygo WMS** !

- **Real-Time Visibility:**
Across multiple locations and zones.
- **Optimized Layout:**
Smart storage utilization that saves space.
- **Error Reduction:**
Cut manual picking errors by up to 99%.
- **Enhanced Productivity:**
Automated task assignment for your workforce.
- **Regulatory Compliance:**
Audit-ready data for safety and standards.

Functionalities

“Every Asset Has a Voice.”

Eliminate the "Black Hole" of storage. Every pallet, box, and forklift gets a digital identity. Our system runs automated cycle counts and health checks daily—so you never have to shut down for an audit.

Low Stock Alerts

Instant notifications for critical inventory levels to prevent stockouts

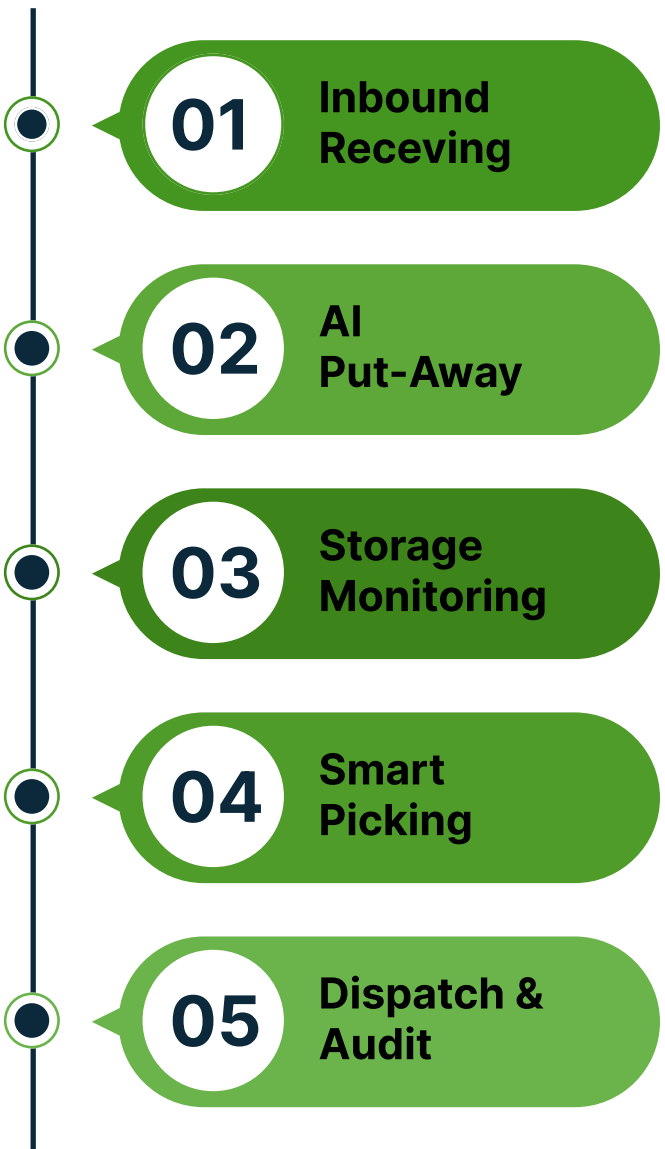

Condition Alerts

Real-time warnings for temperature deviations or equipment misuse

Implementation Flow

Our automated alert engine acts as a 24/7 watchdog. By catching inventory dips and environmental deviations the moment they occur, you eliminate stock-outs and spoilage risk without needing constant human supervision.

By digitizing every step of this journey, Mendygo WMS creates a closed-loop system where data flows as fast as your goods. The result is a transparent, audit-proof supply chain that accelerates throughput .

About Us

Total Warehouse Intelligence. Mendygo WMS is an end-to-end solution that optimizes not just your stock, but your entire facility. From **Material Handling Equipment (MHE)** to **Environmental Safety**, we unify your operations into one seamless, AI-driven ecosystem

In a world demanding instant delivery, manual processes are your biggest bottleneck. Mendygo WMS replaces guesswork with absolute precision. By integrating RFID tracking, IoT sensing, and AI-driven slotting, we eliminate the "black holes" in your inventory.

Why Choose Us?

- **Asset Tracking**

We track more than just boxes. Monitor forklifts, racking units, and security systems in real-time

- **Space Optimization**

AI algorithms suggest you the perfect bin logic to maximize your storage density.

- **Safety First**

Integrated monitoring for temperature, humidity, and unauthorized access.

Our Expertise

Inventory Tracking & Management

Monitor stock levels, expiry dates, and batch/lot numbers with absolute precision.

Material Handling Monitoring

Track forklift and AGV usage to optimize routes and reduce idle time.

Order Fulfillment & Shipment

Automated picking and packing workflows to ensure on-time dispatch, every time.

Use Cases

- **Cold Chain & Food:**

Monitoring temperature sensors to prevent spoilage of perishables

- **Manufacturing Logistics:**

Just-in-Time supply of raw materials to production lines.

- **Retail & E-Commerce:**

High-speed fulfillment with precise batch and expiry tracking.

- **High-Value Storage:**

Enhanced security monitoring for sensitive or expensive assets.
